EXPLOSIVE CONTENT • A FREE CLAUDE CODE SKILL

Find the YouTube topics strangers already watch.

Stop guessing what to record. Look for a video with **more views than its channel has subscribers**. The fans didn't do that. The topic did.

10,300
subscribers on the channel

447,348
views on one B2B lead generation video

43x
reach beyond its own audience

The method in 4 steps

1. **Write down 15 to 25 keywords** in the words your buyer types. Mix what they want ("more leads", "close bigger deals") with what you teach.
2. **Search YouTube for each one.** Keep every video whose views beat its channel's subscribers.
3. **Pick one honest outlier per keyword.** Same topic, same buyer as yours. Rank them by reach.
4. **Record the top ones.** Copy the topic, never the content. Your method, your numbers, your stories.

Throw out the noise

1. **No Shorts.** Keep videos of 3 minutes or more. Shorts inflate the ratio.
2. **No paid ads.** Likes under 0.3% of views usually means bought views.
3. **No tiny channels.** Under 500 subscribers, one share skews everything.
4. **No off-topic hits.** Job hunting, consumer selling, reuploads: out.

What it tells you

1. **What buyers want explodes.** Leads, cold email, a pipeline, AI tools, closing.
2. **What's missing doesn't get searched.** "Cost of inaction", "stop being needy", "stop discounting": not one video beat its channel. Put the want in the title. Put your method inside the video.
3. **Rerun monthly.** Topics cool down, new ones heat up.
